PROFESSIONAL SUMMARY

Motivated and detail-oriented MERN Full Stack Developer (Fresher) with hands-on experience building responsive, scalable web applications using MongoDB, Express.js, React.js, and Node.js. Proficient in REST API development, state management with Redux, containerization with Docker, in-memory caching with Redis, and integrating third-party services such as the Stripe payment gateway. Skilled at translating requirements into clean, maintainable code and eager to contribute to a dynamic development team delivering high-quality software solutions.

TECHNICAL SKILLS

Frontend: React.js, Redux, HTML5, CSS3, JavaScript (ES6+), Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, MVC Architecture

Database & Caching: MongoDB, Mongoose ODM, Redis

Tools & DevOps: Git, GitHub, Docker, Postman, VS Code, npm

APIs, Auth & Payments: REST APIs, JWT Authentication, Session-based Authentication, Stripe Payment Gateway Integration

Other: Responsive Design, CRUD Operations, Containerization (Docker), In-Memory Caching (Redis)

PROJECTS

Student Task Management System — *React.js | Node.js | Express.js | MongoDB | Redux | JWT Auth | Bootstrap*

- Developed a full-stack task management platform enabling students to create, organize, and track assignments and study tasks.
- Implemented role-based authentication (Admin / Teacher / Student) using JWT tokens.
- Built RESTful APIs for tasks, deadlines, subjects, and progress tracking, and integrated Redux for global state management across student and teacher dashboards.
- Added due-date reminders and status labels (Pending, In Progress, Completed) for better task tracking.

E-Commerce Web App — *React.js | Node.js | Express.js | MongoDB | Stripe | Redux | Bootstrap*

- Built a complete e-commerce platform with product listing, cart, wishlist, and checkout functionality.
- Integrated the Stripe payment gateway for secure online transactions and developed an admin dashboard for inventory, order, and user management.
- Implemented JWT-based user authentication and protected routes.

Online Food Order Web Application — *React.js | Node.js | Express.js | MongoDB | Stripe | Bootstrap*

- Created a restaurant-style food ordering app with menu browsing, cart, and order tracking.
- Built backend APIs for restaurants, menus, orders, and delivery status management.
- Integrated Stripe for payment processing and a secure checkout flow.

EDUCATION

Bachelor of Computer Applications (BCA) — Final Year (Expected Graduation: 2026)

Relevant Coursework: Data Structures, Database Management, Web Technologies, Object-Oriented Programming, Computer Networks.

KEY STRENGTHS

Full Stack Development, REST API Design & Integration, Responsive UI Development, Version Control (Git/GitHub), Payment Gateway Integration, Docker & Containerization, Redis Caching, Problem Solving & Debugging
